

GALETES CAMPRODON, S.A., ENVIRONMENTAL POLICY

As a company engaged in manufacturing, packaging and marketing biscuits, Galetes Camprodon S.A. believes environmental stewardship is a key factor in achieving business excellence and quality in order to be more competitive in the market.

Due to the raw materials the organisation uses, the features of its processes and mainly the waste it generates, Galetes Camprodon S.A. has chosen to introduce an environmental management system to:

- ✓ Continuously improve the organisation's environmental performance,
- ✓ Prevent pollution,
- ✓ Safeguard the environment,
- ✓ Use resources sustainably,
- ✓ Comply with applicable legal requirements and others the organisation endorses concerning its environmental aspects.

Our organisation's operations include a number of environmental aspects which Galetes Camprodon S.A. has identified. Measures are also taken to mitigate their impact on the environment based on how significant our organisation's operations are for each one. Galetes Camprodon S.A. draws on this information to set environmental goals and targets which are reviewed once a year. These goals and targets enable Galetes Camprodon S.A. to:

- ✓ Lessen the environmental aspects assessed as significant.
- ✓ Prevent all types of environmental aggression, especially pollution, and natural resource depletion and also minimise waste generation.

The participation and unconditional support of all the company's staff, expressed in a strong and ongoing commitment to the organisation's environmental performance, and the input of our customers and partners are essential in implementing our policy and achieving our goals. Our senior management leadership fosters teamwork and the engagement of everyone through communication and training.

Camprodon, 1 April 2021

Victor Marsal
CEO
